

7th CHINA RARE EARTH MARKET CONFERENCE 2017

Ganzhou, China
March 22-24, 2017

Welcome to the 7th China Rare Earth Market Conference 2017

The rare earth market continued sluggish in 2016, with continuously falling prices and slow growth of downstream deep processing enterprises. The depression has lasted for five years. The "13th five year" Plan for Development of Rare Earth Industry, the first plan for rare earth industry in China, was published in 2016, and the Regulations for Management of Rare Metals will be issued soon. In 2017, the economic growth in China might slow down further, and China faces complicated international situations, e.g. high pressure on falling exchange of RMB against USD, and new USA president taking office.

Ruidow sincerely invites the scholars around the world to gather in Ganzhou and discuss how to fully play the resource superiority of rare earth in China under the circumstance of supply-side structural reform, aiming at promoting healthy development of rare earth industry in China.

REGISTRATION INCLUDES // Entry to all sessions for 3 day programme // Lunch and tea breaks during programme // Welcome dinner on March 22 and conference dinner on March 23// Tour cost on March 24 // Delegate pack + Conference proceedings // Delegate Messenger System Access

WELCOME TO GANZHOU

---Ganzhou, The Kingdom Of Rare Earth

Ganzhou, our conference destination, is known as the kingdom of rare earth in Southern China's Jiangxi Province, is named after the Ganjiang river. Over the past four decades, 70% of China's heavy rare earths were produced in Ganzhou. The city spans 40,000 square kilometers, the same size as Switzerland. More than 70% of its administrative area is forested, and over 83% is also mountainous. Enjoying a subtropical humid monsoon climate, the city has abundant rainfall. The annual average temperature is about 19°C (66°F).

Fubie Pond on Sanbai Mountain Scenic Area

Ruijin Central Revolutionary Base Area Memorial Hall

Ganzhou is known as the orange capital of the world, the cradle of Hakka community, as well as the tungsten capital of the world. Ganzhou has a history of more than 2,200 years, it is one of the famous revolutionary areas in China, and used to the locus of the Central Revolutionary Base and Chinese Soviet Republic temporary government. Many Chinese proletarian revolutionists, including Chairman Mao Zedong and Premier Zhou Enlai, took part in revolutionary activities in Ganzhou. The world-famous Long March started from Ganzhou.

Famous scenic spots in Ganzhou mainly include Sanbai Mountain in Anyuan county, Jiulian Mountain in Longnan county and the Post Road at the Meiguan Pass in Dayu county.

Ganzhou Huangjin Airport is seated in the south outskirts of Ganzhou, only 4 kilometers (2.5 miles) from the city proper.

Tel: 86 153 0103 8673
Mob: 86 185 1905 6715

Main Services:

Price Quotation: in-time, fast and real information of market price and industry news of related products, to provide basis for you to have a clear view of market situation;

Market Comment: write market analysis articles with first-hand information and to provide references for you to estimate the market tendency;

SMS Quotation: provide the product price information of the day accurately and timely so that you can always know the market trend anytime and anywhere;

Industry Data: mainly include price, production, import and export data of the products of relevant industries as well as the related analysis report to provide the data support to you for making business planning and decision;

Electronic Journal: to provide the national and international clients with monthly report, quarterly report and annual report in both Chinese and English with the contents covering the analysis on national and international market movements, the production, investment of the relevant industries as well as the forecast to the future market. The main monthly publications include *Rare earth Monthly*, *Zirconium Monthly*, *Titanium Monthly* and *Tungsten Monthly*, etc.

Industry Conference: Ruidow initiates and hosts the Industry Conferences for the relevant products. We will invite domestic and international producers, suppliers, investors, traders as well as government officials to attend to have a discussion on the industry situation and future development; we also participate in the organization of the conference held by other organizers, such as "Real Earth Sophisticated Experts Meeting", "Baotou Real Earth Industry Forum", etc. The "Global Zircon Industry Conference" held by Ruidow is already a remarkable global conference in zircon industry. There are over 400 delegates attending every time. "Real Earth Market Seminar" and "Global Titanium Feedstock Conference" are also influential conferences in China and outside China. "China Tungsten and Tungsten Carbide Market Seminar" is also well accepted;

Column Cooperation: Ruidow started to cooperate with *China Non-ferrous Metals* in 2013 to jointly open the Column for real earth on this newspaper, providing introductions to national and international clients the current real earth market movements;

Specific Project Research: provide specialized research work to clients who have special requirements;

Advertising Service: provide advertising business for both domestic and international clients on the official website, conference publication, real earth special page and electronic journal in order to promote the image and improve the reputation for enterprises.

Value-Added Services

B2B Platform: a business trading platform covering multi-product and full directions, to build a powerful one-stop shopping platform for enterprises;

Technology Consulting: to solve problems of production and scientific research with the support from numerous industry experts;

Market Research: a large scale investigation and survey on segmentation industries, provide information support to enterprises on industry status and industry development trend;

Enterprises Website: one-click enterprise shops, personalized web page, to build web advertising platform for the enterprises.
